

Easily deliver IoT solutions to any market and unify the management of heterogeneous devices

with **CommonSense** .
IoT Platform

Application Enablement Platform + support

CommonSense is an IoT service platform for any Sigfox device maker or service provider that would need it.

We support you with our IoT expertise & partners.

Flexible business models

- White label: provide a branded front-end to your customers and partners.
- Cloud-based (Saas) or On-Premises (License)
- Pay-as-you-grow: no heavy initial investment

Standard and open tools to easily create IoT solutions

-  Lua scripting
- REST, MQTT APIs, webservices...
- Open standards: oneM2M

Performant and scalable

- Highly scalable (carrier-grade logic)
- Secured

Team up with an IoT expert

CONNECT - Multi-connectivity IoT solution

Heterogeneous devices support

Unify heterogeneous network of things on a single service platform.

Easy Sigfox and LoRa device integration with Lua scripting.

MANAGE - IoT device management platform

Technical and business tools

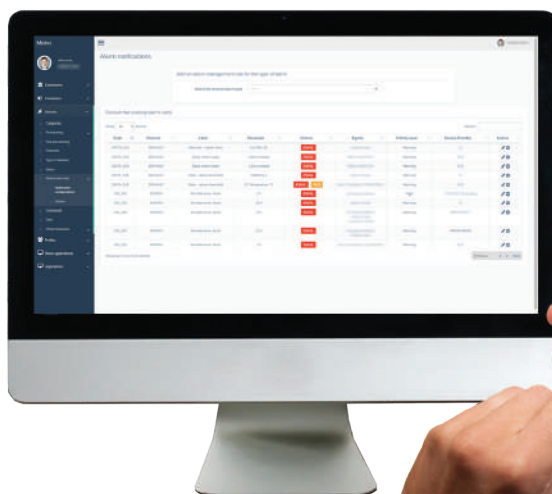

to manage your IoT infrastructure and configure your IoT solutions.

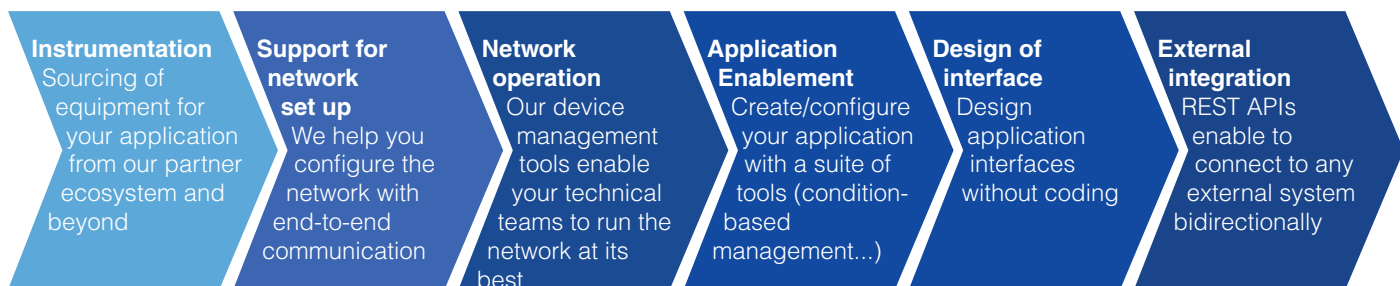

DESIGN - Application & APIs

3 modes of creating IoT applications:

- Custom dashboard
- Custom application
- REST & MQTT APIs to connect to your information systems or existing applications
- Off-the-shelves applications

We support you on the whole IoT value chain with CommonSense IoT platform and our ecosystem of partners

CommonSense IoT platform modules

DESIGN - Application design and APIs

Custom Dashboard	Custom application or on-the-shelves solutions	REST and MQTT APIs
------------------	--	--------------------

MANAGE - IoT Device Management Platform (DMP)

Equipment monitoring (status, payload timeline, statistics...)	Multi alerting <small>with Lua</small>	Multi-account & access
IF... THEN Condition-based management	Tracking & geofencing	Virtual measures for analytics <small>with Lua</small>
Multi-condition automation	Full control-command	Easy equipment integration with live scripting <small>with Lua</small>

CONNECT - IoT multi-connectivity solution

Heterogeneous protocols & technologies support	Scalable platform	LPWA expert Multiple supported architectures
--	-------------------	--

Work with a unique expert

- **Telecom experts:** we design the best IoT infrastructure with heterogeneous networks
- **Software specialists** with a reference platform for device & data management accelerating the creation & deployment of your IoT applications
- **Field experts.** Numerous projects in the utility, building & city services fields

We are experts in IoT/M2M with **9 years of experience**. Beyond, we have been running, operating and managing Cloud, telecom and IT infrastructures **for about 15 years**.

Leader in multi-technical services,

Network Operator, Switzerland

Wifi & network integrator, France

Gas utility, France

Pharmaceutical leader, Belgium

Process automation company, Germany
